

What is oneXerp?

Welcome to oneXerp, the ultimate tool for small businesses looking to streamline and organize their purchasing processes. Our platform consists of three main workspaces: the **requesting workspace**, the **receiving workspace**, and the **transportation workspace**.

The **requesting workspace** allows you to easily request items needed for your projects, while the **receiving workspace** lets you verify the output of our OCR component as you receive your orders. The **transportation workspace** helps you schedule pickup and delivery for items being transported to and from your various work sites. We help you manage all aspects of your purchasing process with ease.

Say goodbye to the chaos of manual purchasing processes and hello to increased efficiency and organization with oneXerp. Try it out today and see the difference it can make for your business!
